One Dollar a Year

# South America and the War

At this time it is advisable for us to know just what attitude the various Latin republics have toward the present world crisis.

No South American nation has anything to gain by a German victory. In each of these republics there is a strong party made up of German immigrants and native born who hold close business relations with Germany. In places this party is dangerous because of its strength.

Many South Americans have no special love for Germany, but fear and distrust the United States more than they do the Kaiser's government. This holds true among the greater part of the weaker republics.

Fortunately the A. B. C. powers understand our point of view better.

Brazil with her great German population, which she fears, is heartily in sympathy with us. Chile in a similar plight, to which she has not awakened, together with Argentina do not care to run any risk of getting into trouble.

Since South America has so successfully held aloof from the passion and sufferings of the war, many of her public men think they see an opportunity for their nations to become meditators in this greatest of world wars. We doubt if this ambition ever shall be gratified.

# Fight High Cost of Living

A thrift garden, properly cultivated in the back yard, 25x50 feet, at a cost not exceeding \$2.00 for seeds and \$5.00 for fertilizer -

Will very materially reduce the cost of living.

Will supply a family of six with fresh vegetables hroughout the season.

Will yield, in cash value, produce worth from \$50 to \$100 per season.

Will provide wholesome and profitable exercise for mind and body.

Will make a more contented people.

Will teach prepardness and economy.

Will conserve the nation's resources.

Beattyville Man Promoted

Maj. G.T. Smith of Beattyville, commander of the Third Battalion Second Regiment, was promoted to Colonel of the regiment last Thursday by Gov. Stanley, succeeding Col. Allen Gullion, who resigned to resume his rank as Captain in the United States Infantry. Capt. Frank Ripy of Lawrenceburg recently was appointed Lieutenant-Colonel, leaving a vacancy on the staff as Captain and supply officer and the vacancy in the Third Battalion.

Col. Smith received his commission personally from Gov. Stanley. . He is a dentist and farmer as well as postmaster of Beattyville, and he is busy arranging his affairs to be ready to answer a call for troops.

Orders That Navy Be Recruited To Full War Strength of 87,000 Enlisted

# MILITIA CALLED TO COLORS

Guardsmen Out To Protect Industries In Case of Domestic Disorders-Congress Is To Determine System Under Which Army Is to be Raised.

Western Newspaper Union News Service Washington.-President Wilson took steps to place the nation on a war ooting. By executive order he directed that the navy be recruited without delay to full authorized war strength of 87,000 enlisted men. Taken in connection with emergency naval construction already ordered, this means that the President has exercised the full limit of his legal powers as commander in chief to prepare the navy for war. For the army, the President directs that two new military departments be created in the Atlantic coast region. The order means that the task of organizing whatever army Congress may authorize will be divided among six departmental commanders instead of four, in the interests of speed and efficiency in mobilization.

Militia Is Called Out.

The third step was to assume, as a national duty, the task of protecting American industries from domestic disorders in the event of hostilities. For this purpose eleven full infantry ragiments, two separate battalions, and one separate company of national guardsmen were called back into the Federal service to act as national police in important districts. Supplementing these troops a regiment of Pennsylvania guardsmen and two companies of Georgia infantry, en route home from the border for muster out, were ordered to be retained in the Federal service. The President's orders were made known in terse official statements issued by both departments. No explanation accompanied them except the statement that reorganization of the military departments, effective May 1, was designed to facilitate decentralization of com-

Following is the executive order bringing the navy up to war strength: "By virtue of the authority vested in the President by the act of Congress, naval service for the fiscal year ending June 30, 1917, and for other purposes,' it is hereby directed that the authorized enlisted strength of the navy be increased to 87,000 men. (Signed.) "WOODROW WILSON.

Raider Passes Into the China Sea. Tokyo.-Reports received by Japanese shipping companies from Singapore indicate that a German raider has passed from the Indian Ocean into the China Sea. The raider is a converted naval service by giving special promicruiser of 4,000 tons, with a crew of more than 350, including many Span- order. iards and Chinese. A Chinese skipper who escaped the raider in the straits reports that the raider has a captured British crew on board.

Fires on a Guard.

Havre de Grace, Md.-Shots were exchanged between a sentry on duty at the Pennsylvania railroad bridge over the Susquehanna river, and an unidentified man in a rowboat, who failed to move away from the bridge The boatsman disappeared in the dark. It is not known whether he was

17,400 Men Wanted For the Marine Corps.

# ISSUE IS DISCUSSED

More Guarde Called Out In Middle President's Address to Congress.

Washington, March 27.-Preparations for war by the government have included calling into the federal serv lee a score of additional guard regiments for police service in the western and middle western states, and an order for immediate recruiting of the marine corps to full war strength of 17.400 men.

With both the navy and the marine corps ordered up to full strength, the only remaining step to increase the navy personnel without action by congress is the calling out of the naval militia. It has been understood that the militia will be needed to fill out crews for the many vessels to be added, but no announce ment on the subject has been made.

Secretary Baker says that no further call upon the national guard was in prospect. More than thirty-two regiments have been summoned to federal duty to guard industries or other property which might be threatened by internal disorder growing out of the German situation.

The address to be delivered to the congress next week by the president was talked over at the cabinet meeting today. The suggestion that a large sum in the form of money or credits be furnished one or all of the entente allies is one of the important problems to be taken up.

The order to increase the marine corps from its present authorized maximum of 14,981 to 17,400 was announced by Secretary Daniels in the following statement, telegraphed to newspaper editors whose aid in anding the men is sought. "The president has signed an exe-

thorized by congress, in case of emergency, to direct such increase in enlistment.

defense Marines serve both ashore ports. and afloat and are trained as infantry, heavy and light artillery and machine approved August 29, 1916, entitled, 'An gun companies. > "In this emergency you have the opportunity and privilege of perform ing this public service, and I am con fidently appealing to you for your cordial and helpful co-operation. To give the navy 87,000 bluejackets

and add the marines needed more than 25,000 men must be recruited. There was continued discussion on the motive of the war department in transferring Major General Wood to minister. The relations of Russia the new southeastern military department from his present post in com-

mand of the eastern department. Secretary Baker again refused to discuss the matter and no explanation was forthcoming from any other source that fixed the action as more than a question of administrative routine.

#### MUST BE READY TO FIGHT Applicants For Citizenship Cannot Ger

First Papers Unless Worthy.

St. Louis, March 27.-Instructions that first naturalization papers should be refused to applicants who are unwilling to fight for the United States were given by Judge Dyer, of the United States district court here.

On this order, first papers were re fused to Joseph Gandil, who said he had two brothers in the German army and would not be willing to fight against Germany, but would go back there if he could.

Burglare Loot Kansas Bank. Kelly, Kas., March 27.-Burglare blew open the safe of the State bank here, making away with \$967.88. Four shots of nitroglycerine were fired and the bank building was badly damaged.

The English and French continue to make advances on the French frontier of the war. The destruction caused by the Germans as they retreated to their new lines has arroused the soldiers of the allies to their highest fighting pitch.

The first acts of the new Russian government were suggestive of the new order of things in that country. They have given freedom of speech and press, liberated the political prisoners and given rights to the West to Guard Nation's Commerce Jews, so long persecuted. Many and Industry—Cabinet Discusses noted revolutionary leaders have returned from exile in Siberia and are taking an active part in the affairs of the country.

> The Germans are making efforts to advance on Petrograd and capture it before the new Russia is able to marshall its strength. It is possible that the capital may be removed to Moscow, which is a more central location. This place was the capital previous to the time of Peter the Great.

English armies are nearing Jerusalem, with some prospect of taking possession of it in the near future. The loss of this place by the Turks would have the effect of stimulating the hopes of the Zionists who are working for a restored nation for the Jewish people, in the old home of Palestine.

The ministry of Briand in France has resigned on account of its industrial policy. It must be credited with many changes which have made possible the present success of the French armies. A new ministry under Ribot has been formed. which promises to be strong, since the prime minister is one of the most experienced and able political leaders in France.

CHAPTER XIII.

Fate Takes Charge.

For hours Prudence lay unconsciou with two doctors in close attendance. Fairy, alert but calm, was at hand to give them service.

It is a significant thing that in bitter anguish and grief, Christians find comfort and peace in prayer. Outsiders, as well as Christians, pray in times of danger and mental stress, pray, and pray, and pray again, and continue still in the agony and passion of grief and fear. And yet they pray. But Christians pray, and find confidence and serenity. Sorrow may remain, but anguish is stilled.

Mount Mark considered this a unique parsonage family. Their liveliness, their gayety, their love of fun, seemed a little inapropos in the setting of a Methodist parsonage.

"They ain't sanctimonious enough by half," declared old Harvey Reel, the bus driver, "but, by Jings! I tell you they are dandles!"

But as a matter of fact, every one of the family, from Connie up, had a characteristic parsonage heart. When they were worried, or frightened, or grieved, they prayed. Fairy passing up the stairs with hot water for the doctors, whispered to her father as he turned in to his own room, "Keep on praying, father. I can't stop now, because they need me. But I'm praying every minute between errands!" And Mr. Starr, kneeling beside his bed, did pray-and the stony despair in his eyes died out, and he came from the little room quiet, and confident, and

Connie, seeking a secluded corner to "pray for Prudence," had passed the door of the dungeon, and paused. A fitting place! So she turned in at once, and in the farthest and darkest corner, she knelt on the hard floor and prayed, and sobbed herself to sleep.

Lark remained loyally with Carol until consciousness returned to her. As soon as she was able to walk, the two went silently to the barn, and climbed into the much-loved haymow. There they lay flat on the hay, faces downward, each with an arm across the ler, praying fervently. After a time they rose and crept into until Fairy came down on one of her numerous errands.

"Is she better?" they whispered. And Fairy paswered gently, "I think she is fell back on the pillows. a little better." Then the twins, in no way deceived, went back to the haymow again.

Fairy prepared a hasty supper, and arranged it on the kitchen table. She drank a cup of hot coffee, and went in search of her father. "Go and eat, dadsie," she urged. But he shook his head.

"I am not hungry, but send the girls to the table at once.'

On their next trip into the house Fairy stopped the twins. "Get Connie and eat your supper. It's just a cold lunch, and is already on the kitchen table. You must help yourselves-1 can't come now."

The twins did not speak, and Fairy went hurriedly up the stairs once more "I do not think I can eat," said Carol. "We'd better take away about half of this food, and hide it. Then she will

think we have already eaten." This novel plan was acted upon with promptitude and the twins went back to the haymow. When it grew dark they slipped into the kitchen and huddled together on the woodbox beside the stove. And down to them presently came Fairy, smiling, her eyes tear-

brightened. "She is better!" cried Carol, springing to her feet.

"Yes," said Fairy, dropping on her knees and burying her face in Lark's lap, as she still sat on the woodbox. 'She's better. She is better." Lark patted the heaving shoulders in a motherly way, and when Fairy lifted her face again it was all serene though her lashes were wet.

"She is conscious," said Fairy, still on her knees, but with her head thrown back, and smiling. "She regained consciousness a little while ago. There is really nothing serious the matter. It was a hard knock, but it missed the temple. When she became conscious, she looked up at father and smiled. Father looked perfectly awful, twins, so pale, and his lips were trembling. And Prudence said, 'Now, father, on your word of honor, did you knock me down with that ball on purpose? She spoke very

dence! Father couldn't say a word; he just nodded, and gulped. She has a little fever, and the doctors say we may need to work with her part of the night. Father said to ask if you would go to bed now, so you can get up early in the morning and help us. I am to stay with Prudence tonight, but you may have to take turns in the morning. And you'll have to get breakfast, too. So father thinks you would better go to bed. Will you do that, twinnles?"

"Will we!" And Carol added, "Will you kiss Prudence good night for us, and tell her we kept praying all the time? Prudence is such a great hand for praying, you know."

Fairy promised, and the twins crept upstairs. It was dark in their room. We'll undress in the dark so as not to awake poor little Connie," whispered Lark. "It's nice she can sleep like that, Isn't it?"

And the twins went to bed, and fell sleep after a while, never doubting that Connie, in her corner of the room, was already safe and happy in the ob-

livion of slumber.

But poor Connie! She had not wakened when Fairy closed the dungeon door. It was long afterward when she sat up and began rubbing her eyes. She did not know where she was. Then she remembered! She wondered if Prudence— She scrambled to her feet, and trotted over to the dungeon door. It was locked; she could not turn the knob. At first she thought of creaming and pounding on the door.

"But that will arouse Prudence, and frighten her, and maybe kill her," she thought wretchedly. "I'll just keep

still until someone passes."

But no one passed for a long time, and Connie stretched her aching body and sobbed, worrying about Prudence, fearful on her own account. She had no idea of the time. She supposed it was still early. And the parsonage was deathly quiet. Maybe Prudence had died! Connie writhed in agony on the hard floor, and sobbed bitterly. Still she would not risk pounding on he dungeon door.

Upstairs, in the front room, Prudence vas wrestling with fever. Higher and higher it rose, until the doctors looked very anxious. They held a brief consultation in the corner of the room. Then they beckoned to Mr. Starr.

"Has Prudence been worrying about something this winter?"

"Yes, she has." "It is that young man, isn't it?" inquired the family doctor-a Methodist

"Can you bring him here?" "Yes—as soon as he can get here from Des Moines."

"You'd better do it. She has worn herself down nearly to the point of prostration. We think we can break this fever without serious consequences, but get the young man as soon as possible. She cannot relax and rest until she gets relief."

So he went downstairs and over the telephone dictated a short message to Jerry: "Please come-Prudence."

When he entered the front bedroom again, Prudence was muttering unintelligible words under her breath. He kneeled down beside the bed and put his arms around her. She clung to him with sudden passion.

"Jerry! Jerry!" she cried. Her father caressed and petted her, but did not speak.

"Oh, I can't," she cried again. can't, Jerry, I can't!" Again her voice the house where they waited patiently fell to low mumbling. "Yes, go. Go at girls and me. It never occurred to me once. I promised, you know. They that you considered us a bunch of selfhaven't any mother—I promised. ish, heartless, ungrateful animals!"

Jerry! Jerry!" Then, panting, she "Father!"

But Mr. Starr smiled gently to himself. So that was the answer! Oh, foolish little Prudence! Oh, sweethearted little martyr girl!

Hours later the fever broke and Prudence drifted into a deep sleep.

But Mr. Starr Smiled Gently to Him self.

Then the doctors went downstairs with things other girls make when they Mr. Starr, talking in quiet, ordinary

"Oh, she is all right now, no danger at all. She'll do fine. Let her sleep. Send Fairy to bed, too. Keep Prudence quiet a few days-that's all. She's all right.'

They did not hear the timid knock at the dungeon door. But after they had gone out, Mr. Starr locked the door behind them, and started back through the hall to see if the kitchen low and weak, but just like Pru- doors were locked. He distinctly Grace than me?"

heard a soft tapping, and he smiled. "Mice!" he thought. Then he heard something else—a faintly whispered, "Father!"

With a sharp exclamation he unlocked and opened the dungeon door, and Connie fell into his arms, sobbing piteously. And he did the only wise thing to do under the circumstances He sat down on the hall floor and cuddled the child against his breast. He talked to her soothingly until the sobs quieted, and her voice was under control.

"Now, tell father," he urged, "how did you get in the dungeon? The twins

"Oh, no, father, of course not; the "Oh, no, father, of course not; the twins wouldn't do such a thing as that. I went into the dungeon to pray that Prudence would get well. And I prayed myself to sleep. When I woke up the door was locked."

"But you precious child," he whis-

pered, "why didn't you call out, or pound on the door?"

"I was afraid it would excite Prue and make her worse," she answered simply. And her father's kiss was unwontedly tender as he carried her up-stairs to bed.

Prudence slept late the next morn-ing, and when she opened her eyes her father was sitting beside her.

"All right this morning, father," she said, smiling. "Are the girls at "No, this is Saturday."

"Oh, of course. Well, bring them up, I want to see them."

Just then the distant whistle of a ocomotive sounded through the open window, but she did not notice her father's sudden start. She nodded up at him again and repeated, "I want to see my girls."

Her father sent them up to her at once, and they stood at the foot of the bed with sorry faces, and smiled at

"Say something," whispered Carol, kicking Lark suggestively on the foot. But Lark was dumb. It was Carol who broke the silence.

"Oh, Prudence, do you suppose the doctors will let me come in and watch them bandage your head? I want to begin practicing up, so as to be ready for the next war."

Then they laughed, and the girls realized that Prudence was really pressed his face to hers.

alive and quite as always. They told her of Connie's sad experience, and Prudence comforted her sweetly.

"It just proves all over again," she declared, smiling, but with a sigh close following, "that you can't get along without me to look after you. Would I ever go to bed without making sure that Connie was safe and sound?"

Downstairs, meanwhile, Mr. Starr was plotting with Fairy, a willing assistant.

"He'll surely be in on this train, and you must keep him down here until I get through with Prudence. I want to tell her a few things before she sees him. Bring him in quietly, and don't let him speak loudly. I do not want her to know he is on hand for a few minutes. Explain it to the girls, will you?"

After sending the younger girls downstairs again, he closed the door of Prudence's room, and sat down beside her.

"Prudence, I can't tell you how bitterly disappointed I am in you." "Father!"

"Yes, I thought you loved us-the

"Is that your idea of love? Is that

"Oh, father!"

"It really did hurt me, Prudence. My dear little girl, how could you send Jerry away, breaking your heart and his, and ours, too-just because you thought us such a selfish lot that we would begrudge you any happiness of your own? Don't you think our love for you is big enough to make us happy in seeing you happy? You used to say you would never marry. We did not expect you to marry, then. But we knew the time would come when marriage would seem beautiful and desirable to you. We were waiting for that time. We were hoping for it. We were happy when you loved Jerry, because we knew he was good and kind and loving, and that he could give you Courier-Journal. all the beautiful things of life-that I can never give my children. But you thought we were too selfish to let you go, and you sent him away."

"But father! Who would raise the Who would keep the parsonage? Who would look after you?"

"Aunt Grace, to be sure. We talked it over two years ago, when her husband died. Before that, she was not free to come to us. But she said then that whenever we were ready for her she would come. We both felt that since you were getting along so magnificently with the girls, it was better that way for a while. But she said that when your flitting time came, she would come to us gladly. We had it all arranged. You won't want to marry for a year or so, yet. You'll want to have some happy sweetheart days first. And you'll want to make a lot of those pretty, useless, nonsensical marry. That's why I advised you to save your burglar money, so you would have it for this. We'll have Aunt Grace come right away, so you can take a little freedom to be happy, and to make your plans. And you can initiate Aunt Grace into the mysteries of parsonage housekeeping."

A bright, strange light had flashed over Prudence's face. But her eyes chickens?" clouded a little as she asked, "Do you "He has think they would rather have Aunt

"Of course not. But what has that to do with it? We love you so dearly that we can only be happy when you are happy. We love you so dearly that we can be happy with you away from us, just knowing that you are happy. But you—you thought our love was such a hideous, selfish, little make-believe that-

"Oh, father, I didn't! You know I didn't !- But-maybe Jerry won't forgive me now?"

"Why didn't you talk it over with me. Prudence?

"I knew you too well, father. I knew it would be useless. But—doesn't it seem wrong, father, that—a girl—that I—should love Jerry more than—you and the girls? That he should come first? Doesn't it seem-wicked?"

"No, Prudence, it is not wicked. After all, perhaps it is not a stronger in Mexico. Why did you do it?" and deeper love. You were willing to sacrifice him and yourself, for our sakes! But it is a different love. is the love of woman for man, that is very different from sister love and father love. And it is right. And it is beautiful."

"I am sure Jerry will forgive me. Maybe if you will send me a paper and pencil, I can write him a note now? There's no use waiting, is there? Fairy will bring it, I am sure."

But when a few minutes later, she heard a step in the hall outside, she laid her arm across her face. Somehow she felt that the wonderful joy and love shining in her eyes should be kept hidden until Jerry was there to see. She heard the door open, and close again.

"Put them on the table, Fairy dearest, and, leave me for a little while, will you? Thank you." And her face was still hidden.

Then the table by the bedside was swiftly drawn away, and Jerry kneeled side her, and drew the arm from her

"Jerry!" she whispered, half unbelievingly. Then joyously, "Oh, Jerry!" She gazed anxiously into his face.
"Have you been sick? How thin you are, and so pale! Jerry Harmer, you need me to take care of you, don't

# REBELLION

By SUSAN E. CLAGETT.

"You rail against convention," the man at the wheel said, "but you have not told me what you would offer in its place. There is no need for you to go into the byways and hedges in search of the creature man. I can name four who would deem it a privilege to spend the rest of their lives in your company and I know that you have sent them to the corners of the earth. Ralston is in Japan, Howard and Lawrence are driving ambulances in France, Chapman is with Pershing

Sophia Isham looked at her com panion with somber eyes. She could not smile, although the note of amuse ment in his voice would have been contagious if the subject of their talk had not been a vital one to her.

"If I tell you that not one of them has asked me to marry him, would you believe me?"

"Certainly not!" His reply was em phatic.

"So I supposed. Neither will you be-lieve me when I tell you that I have never been asked in marriage, humiliating as is the admission. But it is true, nevertheless. Men find in me a pleasant companion, a good comrade. I am their confidant, but our friendship has never crossed the dividing line between pleasant friendliness and the deeper feeling. That I cannot arouse admiration, love, has cut deep.

"That fact is burned into my consciousness and I resent the attitude of the world toward the woman who would strive for her happiness by seeking it for herself. It is a man-made world, with man-made customs and, perforce, she who finds no favor in his sight must bow to the inevitable and accept the fate thrust upon her. Convention forbids the least little step across the boundary of his dominion, even though she may see happiness beckoning to her from the farthest corner. Why should she be looked upon askance if she venture over that line of demarkation?"

"Well, what are you going to do about it?" he asked with evident amusement as he brought the car to a standstill to allow a heavily loaded wagon to pass on the narrow road. What would you suggest that will take the place of the old-established order of things? You are so essentially feminine that I cannot imagine you taking the initiative in such mat-

"Why not?" she retorted with passionate warmth. "Because I am passed by must I forever give up the thought of love, of companionship, the feel of a warm little body within my arms? Or, if not passed by, must I take what is offered when, unoffered, there is a better which might be mine if I could but overcome the reluctance, entailed by convention and my womanhood, to ask for it?"

"There is a possibility, you know, that you may meet with a rebuff. Have you thought of that?"

She drew in her breath sharply. "I have a right to happiness," she answered stubbornly. "If it will not come in the accepted way I will fight

ously, but there was a strain in her face, in her figure, in her clasped hands that made him feel her earnestness. He had known her for many years, had been a constant visitor in her home and thought he knew her every whim and caprice, but this intensity, underlying her usual cool friendliness, took him unawares. He

was frankly uncomfortable. "You told me there were four," she said presently, breaking the silence that had fallen between them. "They were not lovers, but if they had been my choice would not have been made from among them. They were good dancers, perfect escorts, desirable as comrades, but nothing more."

"How can you say that when you know what they are doing?" he asked gravely. "Do weaklings go to the bat-

"No. But there was a lack hard to explain. What they are doing will develop traits that would have forever lain dormant but for the horrors of this awful war. But when they left they were not the men to whom I would give my heart's blood and think nothing of the giving." She turned to "What is your definihim suddenly. tion of a man?"

He looked at her thoughtfully. "About the same as yours, I think. Force, integrity, honesty of purpose, gentleness, consideration for others, a carrying out of the right as he sees it no matter at what cost to himself."
She nodded. "That is what I want,"

she said tensely, "a man, not the pretense of one.

"You have found such a one?" "Yes. "You have told him that you care?"

"Not yet, but I will, I must." The answer came haltingly. "I-I-oh! Don't you know?" She threw out her hands with a little despairing gesture.
"I think I will die of shame, but don't
you know that it is you?" She ended n a whisper.

For an instant the silence was profound. Then he laughed, a full-throated laugh, in which there was no sting, for he had caught her two hands within his ewn and raised first one and then the other to his lips.

"You dear!" he murmured under his breath. "God grant I am worthy of your belief, that I will never disappoint you."

# RAILROAD SITUATION IS NOW LARGELY **UP TO CONGRESS**

Must Share Responsibility in Future Development.

#### ROBERT S. LOVETT'S VIEWS

"Unification of Regulation Is Essential." A Complete, Harmonious, Consistent and Related System Needed-Federal Incorporation of Railroads by General Law Favored.

Washington, March 26.—Responsibility for the railway development of the country, for providing necessary transportation facilities to care for the growing business and population of the country, now rests largely with congress and not entirely with the railroad managers. This was the statement of Judge Robert S. Lovett, chairman of the executive committee of the Union Pacific system, to the Newlands joint congressional committee when that body resumed its inquiry into the subject of railroad regulation this week.

In making this statement of the changed conditions of the railroad situation Judge Lovett undoubtedly had in mind the decision of the supreme court on the Adamson law, handed down last week, which establishes the right of the federal government to fix railroad wages and to prevent strikes. This decision is regarded by railroad men and lawyers as marking an epoch in the development of transportation in the United States.

"We have our share of responsibil ity," said Judge Lovett, "but it rests primarily on congress. When the gov-ernment regulates the rates and the financial administration of the railroads, the borrowing of money and the issuance of securities it relieves the railroad officers of the responsibility of providing and developing transportation systems, except within the limits of the revenue that can be realized from such rates and under such restrictions.

"For a country such as ours, for a people situated as we are, to blunder along with a series of unrelated, inconsistent, conflicting statutes enacted by different states without relation to each other, instead of providing a complete and carefully studied and prepared system of regulation for a business that is so vital to the life of the

nation, is worse than folly." He summed up the present problems and difficulties of the railroads as fol-

lows: First.-The multiplicity of regulations by the several states with respect to the issue of securities, involving delays and conflicting state policies generally dangerous, and possibly disas-

trous. Second.-The state regulation of rates in such a manner as to unduly reduce revenues, to discriminate in favor of localities and shippers within its own borders as against localities and shippers in other states and to disturb and disarrange the structure of

Third.-The inability of the Interstate Commerce Commission, whoever the commissioners may be, to perform the vast duties devolving upon it under existing laws, resulting in delaywhich should never occur in commercial matters-and compelling the commissioners to accept the conclusions of their employees as final in deciding matters of great importance to the commercial and railroad interests of the country.

Fourth.-The practical legality that has been accorded conspiracies to tie up and suspend the operation of the railroads of the country by strikes and violence and the absence of any lawto compel the settlement of such disputes by arbitration or other judicial means, as all other issues between citizens in civilized states are to be set-

Fifth.-The phenomenal increase in the taxation of railroads in recent

Sixth.-The cumulative effect of these conditions upon the investing public, to which railroad companies must look for the capital necessary to

continue developi "We believe that the unification of regulation is essential," said Judge Lovett, "and that with the rapid increase of state commissions in recent years congress will in time be compelled to exercise its power in the premises. To unify regulation there should be a complete, harmonious, consistent and related system. We believe the best, if not the only practical plan, is the federal incorporation of railroads by general law, which will make incorporation thereunder compulsory, thus imposing on all railroad companies throughout the United States the same corporate powers and restrictions with respect to their financial operations and the same duties and obligations to the public and the government, so that every investor will know precisely what every railroad orporation may and may not lawfully

Judge Lovett contended that the solution of these problems and difficulties rested with congress. He told the committee that under the constitution the authority of the federal govern ment is paramount, that congress has the power to legislate for a centralized control of railroads under federal charters and that it only remains for that body to exercise that power.

SMART PEOPLE BUY DRY GOODS AND NOTIONS

# OWEN McKEE

THERE IS A REASON

RICHMOND KENTUCKY

# President and Mrs. Frost Under the **Doctor's Orders**

Dear Friends and Neighbors:

The joy of returning to Berea for a considerable stay is greatly diminished by the fact that all our activities, especially in meeting friends, must be strictly limited.

Mr. Frost's first serious break in 1900 banished him to Michigan for the summer; the second, in 1909, sent him to England for a year. This time Mrs. Frost is equally affected. The Physicians promise full recovery if we will "obey orders" for a few months, but allow us to return to Berea only as an experiment and under strict limitations, among which are these:

1. The President can meet callers only at his Office-mornings between 10 and 11 (Thursdays 10:30

2. No calls or telephone calls upon either of us at the house except by special arrangement through Miss Stoughton at the Office. Miss Stoughton will receive. transmit and answer any communications.

3. We can accept invitations only to bread and milk suppers and vesper calls Monday, Tuesday and Saturday nights. With all good will,

#### COMFORT IN STOCK STABLES

From Stock Shivering and Suffering From Dampness.

It pays to keep the stock comfortable as well as generously fed these nippy winter months. It deplorable when the stock shivers and suffers ment it can be made comfortable with little expense.

Tight stables are not necessarily warm stables. Good ventilation is necessary in order to have the air dry. Damp air is more uncomfortable than dry air of the same temperature. A special ventilation system is a paying investment.

The covered barnyard or open shed that faces the south and has three tight walls, if well bedded with straw and has a straw stack close to the place for stock on a cold day. Many prefer these sheds to tight stables where the cows are confined to stanchions. They have their liverty in the shed and can exercise and keep warm.

## MATE BREEDING SOWS EARLY pepper and serve immediately.

Farrowed in February or March Best Prices in September.

There are many advantages in breeding sows for early farrowing. Pigs farrowed in February or early March come at at season when farmers can give them better care. By the time forage crops become available, the pigs are of such size as to make best use of them, and thus to attain greater size for early fall market.

Hogs are usually highest in price during September. Early-farrowed pigs attain marketable size by that

Late-farrowed pigs do not reach market weight until December or January, when pork prices are usually the

mense Value to the Man Who Is Planning a Home.

The home-maker, with facilities at hand, could choose wisely what to plant in his own home grounds. Lectures, instructive and helpful though they are, can hardly accomplish for the amateur planter in the course of half a year what a single visit to a shrubbery or a perennial garden would accomplish for him in half an hour. And, in addition, as everyone knows the parks themselves would be all the more interesting and delightful for these garden sections.

The average person knows few shrubs and few flowers. To tell one of these that the snowball with which he is familiar is only one of a score or more of available viburnums; that the shrub he knows as a "lilac" can growing even into tree form, or that what he calls the "syringa" or the "mock orange," can be had in dwarf bush that is a mere pygmy beside its robust cousin-to recount facts of this sort is to surprise him. Yet it'is important that facts of this sort be brought before him. There is too much uniformity in the planting of city yards-too much use made of the same material. Public gardens, exhibiting not only the common varieties, but the uncommon as well, those not so often met with but despite that. quite as beautiful as the others, would serve to overcome the tendency toward monotony already only too apparent. There are many purposes, as a matter of fact, that these gardens would serve, all of which the park board might do well to consider.

#### MAIL BOX OF RUSTIC DESIGN

Minnesota Farmer Had Good Idea When He Placed Ornament in Front of His Home.

A rural mail box, rusty and dilapfdated, such as one occasionally sees fastened to the

top of an insecure post at a distressing angle, presents a sharp contrast to the mail box which a Minnesota farmer has erected in front of his home. The box itself, which is of the ordinary metal type, is inclosed miniature log cabin with a gable roof. The post supporting box and cabin

## Fire Prevention Education.

Fire prevention in public schools and fire prevention in homes are matters naturally of keen interest. In the first case the question is largely one of proper legislation regarding the construction and protection of school buildings; in the second case it is largely a matter of individual education. It is estimated that 60 per cent of fires occur in homes, though of course 60 per cent of the fire loss does not result therefrom.

Perhaps it is education which must be relied upon to furnish the chief weapon in the fight for fire prevention. Legislation ts important; so is inspection of the construction and condition of buildings so that legislation may be backed up. But, speaking broadly, the co-operation of the individual, due to his "enlightened selfinterest," is probably the essential factor in fire prevention as it is in the other activities of the Safety First federation.—Baltimore News.

## Owning Home Gives Sense of Security

Ownership, like faith, affords a sense of security-and the whole conception of home is based on a feeling of security. You can close the door and the world is shut out. You can go away from it, and it will be there when you come back.

Now the tenant, the man who lives in other people's houses, can never be sure that it will be there when he comes back. In fact, that is one of the reasons why he lives in another man's house-he doesn't want it there when he comes back. And he sets forth on an eternal quest after an elusive, visionary something whose absence makes this present dwelling a whited

Need Not Endanger Sewers. Complaints are heard of tree roots

entering sewers, but if the joints are perfect no such thing is possible. Roots are attracted only by soil moisture and cannot partake of food through any other medium. Therefore no moisture no roots. Concrete is never waterproof, but may be made so by asphalt and other coverings. If so treated and a good job is done, no tree roots will Berea, Kentucky ever enter a sewer through a joint in the pipe.

# Attractions of Christian Work

By REV. HOWARD W. POPE Moody Bible Institute, Chicago

TEXT—Pray ye therefore the Lord of the harvest, that he will send forth la-borers into his harvest.—Matthew 9:38.

Many complaints are heard in these days about the scarcity of Christian

workers. We are told that the streams are dwindling just as the time when the banks should overflow. Doubtless there are many reasons for this. but one principal reason, I am sure, little is said about Christian work.

is the fact that so the attractions of We are constantly informed that ministers as a class are over-

worked and underpaid, and that they cross the "deadline" at fifty, but seldom do we hear the other side presented. There is another side, and if those who enjoy their work would occasionally set forth its attractions, surely there would be more young men to say: "Lord, here am I, send me!" Among the minor attractions the fol-

lowing may be mentioned: 1. It is a life of contact with men and books. It compels one to read, think and study human nature. A Christian worker may indulge in a wider range of reading than most men. If he has any hobby, such as botany. geology, or electricity, he can pursue it to his heart's content. No knowledge comes amiss to him. Nature and the supernatural are so related that one illustrates and explains the other. For a lawyer or doctor such studies would be a digression, but a Christian worker may explore the heavens, the earth, or the bottom of the sea, and come back better fitted for the special work to which God has called him.

2. The variety of the work is also an attraction. Preaching, prayer meeting and visiting the sick are but a small part of it. He is expected to agitate temperance, to be enthusiastic on missions and to aid Christian endeavor. In fact, every good cause looks to him for support. To be sure, with so many calls upon him, he has little time for profound study, but out of it all he gains experience and versatility and becomes a good, all-around man. He learns what his forte is, and if he is wise he devotes himself mainly to that, leaving to others the work for which he is not fitted. Of all callings ours is the least monotonous. It is a life of constant activity and continual change.

3. One of the chief attractions of Christian work to me is the opportunity which it affords for religious growth. What I am spiritually I owe to my profession. Indeed, knowing my disposition, I am convinced that had I this time have had a good bank account and a soul as small as a mustard seed. A soul-winner must be a good man or fail. His own or others' necessities drive him constantly to the throne of grace and compel him to live in closet fellowship with God.

4. It is no more than fair to admit that there are some discouragements as well as attractions. Inadequate compensation is one of them. The Christian worker is expected to have the instincts of a millionaire, the generosity of a prince, to dress as well as the best, and to do it all on a small income. And, strange as it may seem, most of them manage to do it.

A lady once said to a friend of mine: "I would as soon take a ticket to the poorhouse as marry a theological stuent." But some of the best and brightest girls do not think so, as almost every parsonage can testify. Parish breezes will sometimes spring up and threaten to wreck one's usefulness, but if one will keep his temper and restrain his tongue, the storm will usually blow over and leave him stronger than ever in the affections of his people.

5. The supreme attraction of Christian work, however, is the opportunity which it affords for usefulness, and usefulness of the highest kind. The merchant, the manufacturer and the farmer are all useful men. They supply the wants of the body; but our business is to transform the body into a temple of the Holy Ghost. The surgeon sets broken bones; but we heal broken hearts. The lawyer adminis-ters justice, but the Christian worker proclaims mercy. The one examines titles of real estate, while the other secures titles to mansions in the skies.

A million a month are dying in China without a knowledge of Jesus Christ The entire continent of Africa is still clothed in darkness, for we have only touched the hem of her garment with the days of Gospel light. The agonizing appeals of our home-missionary sudents are enough to thrill a neart of stone. Surely the wents and woes of humanity are in themselves an attraction. And if anything more were needed, is it not found in the final words of our blessed Master: "All power is given unto me in heaven and earth. Go ye therefore unto all the world and preach the gospel to every

(Conducted by the National Woman's Christian Temperance Union.)

LOCAL OPTION.

Mr. J. P. Newell of Portland, Ore., has illustrated the local option policy by a comparison with the levee system of the Mississippi. He says:

"When the country was first settled the planters looked upon the floods as a necessary evil. Then ohe here and there began to build levees around his plantation. This proved highly profitable and the practice spread. Piece by piece was reclaimed and the lowlands made habitable. But as the number of levees increased it was noticed that the difficulty of maintaining them increased also. The floods, restricted in area, grew in height. The expense of protection became so great that many could not afford it, and became discouraged. It was found necessary to abandon the local systems and join in large districts comprising all the territory lying naturally together. By this plan a few large levees kept up by all the people of the district are sufficient to afford protection even from extraordinary floods and the difficulty and expense of maintenance are greatly reduced.

"The local option system has worked well for a time, but it has proved insufficient. As the reclaimed district increases in extent, the pressure against the dikes becomes more severe. The liquor power, as its territory is reduced in area, becomes more determined in its efforts to regain the lost ground, for its leaders realize that their dominion everywhere is threatened by successful revolt anywhere. Our safety lies in going forward. If we stop we shall lose all we have gained."

#### AMERICA'S FIRST DUTY.

The greatest need in America today is the formation of a new national mind, the construction of a new national conscience and a reformation that will bring about a new nation-a nation with a firmer purpose, a clearer vision and a complete understanding of the words patriotism and Americanism.

To bring this condition about, the first problem to be solved is the liquor problem, and the liquor problem's only solution is wiping it entirely and unequivocally off the map. To accomplish the coming of the "New America," every saloon beneath the stars and stripes must be closed.

The great political parties have failed to respond to this call, for they do not want the responsibility, and the time has come for the American people to disregard political parties and rise up in a great army and with all their strength solve the question themselves.

America's danger is not from without; it is from within. Whatever crisis the United States is facing or will face is coming, or will come, from internal causes. It is the American people who have their own problem to settle, their own future to decide. And the first step in this settlement and decision is the elimination of the saloon .- Ex-Gov-Patterson of Tenne

## ALCOHOL AND MEDICINE.

A smashing of ancient idols has occurred in our ideas of the value of alcohol as a medicine. Seventy-five, yes, 50 years ago it was one of the most widely-used remedies, not only in household but also in professional medicine. We gave it to reduce fever and to brace up depression, to improve the appetite and to lessen overeating in sedentary occupations, to stimulate the heart and to lower arterial tension, to break up a cold and to overcome shock. It was believed to ward off infection, to make blood, and to support the strength in septic fevers.

Now we know that it is not a stimulant or tonic, but a depressant; that though in small doses it increases the flow of gastric juice at the beginning of a meal, it checks the process of actual digestion of the food later, so that one influence just balances the other, and in small doses its net effect upon appetite and digestion is just precisely nothing at all, while in large doses it is ruinous.

## POLITICIANS FORSAKE LIQUOR.

Not many years ago it was a frequent comment, rarely contradicted, that the man who championed the prohibition cause was committing po-litical suicide. Today, so great has been the change in the sentiment of voting public that a man in public life dares not admit an alliance with the brewery combine or the distillery trust, realizing full well that if he were to do so he would antagonize the de cent element in his constituency and arouse suspicion even among those who have no strong moral convictions the prohibition question.—The Union Signal.

## DEFICIT IN PEORIA.

The whisky manufacturing town of Peoria, Ill., is reported as showing a ories—just practiced day and day, with deficit in the treasury, a heavy tax different clubs a-hitting at the ball rate, a large police court docket, many arrests, big business at the city prison, and an actual decrease in bank clearings. Quite a contrast with dry Rockford, in the same state.

## CAUSE FOR WONDERMENT.

We were just wondering how an intelligent citizen could vote to continue the liquor traffic and then look a little child in the face.

ick the old man by the beard. I toy with maiden's hair. I rock the young birds in their nests. I drive away dull care.

I sing through forests old and dank And whisper in the ear Of crouching marmots in their sleep And start the tim'rous deer

make a music midst the leaves-A music soft and low— And fill the air with minstrelsy As when the pipers blow.

—John S. Vaughan.

Hitting at the Ball.

Jim used to play in 85. His game was fairly good-could putt, approach and cut the ball, was steady with his wood. Then Jim read all the golfer's books, absorbed each written line and found his game was going bad. He played in 89. Kind friends essayed to help Jim out-instructed what to do. He followed all their kindly tips-and played in 92. And then he cut out thewhere'er it lay. So Jim now finds an 80 is no trick to play at all if he practices plain hitting—just plain "hitting at the ball." Think it over, golfers.— Golfers' Magazine.

One of its moons circles Mars every seven hours.

A mule makes no headway while he is kicking; neither does a man.

#### FORTY THOUSAND DOLLARS FOR THE MOUNTAINS

(Continued from Page One)

his largest benefactions to his alma mater, Oberlin College, Oberlin, O. He then set apart a large sum for hospitals and schools in foreign lands, and the last part of his estate was divided between the American Missionary Association and Berea College.

This property, however, was not to be turned over to the beneficiaries for fifteen years, as he wished to keep the control of the Aluminum Company in the hands of his friend. Mr. Davis, President of the Company. So that the real benefits of this bequest will not come to Berea in the present administration. There will be, however, some income beginning next fall.

As a result of these things Berea will have \$40,000 more to spend next year provided the donations for current expenses continue as is hoped. Its expenditures for current expenses are \$120,000. With these new resources the Trustees propose to extend the work of the Institution in five ways: first they will get enough buildings so that each of the five departments, College, Normal School, Vocational School, Academy and Foundation School will have its own campus and be like a separate institution while sharing in the benefits of the whole; next. there will be a number of added instructors; third, the support of the workers will be somewhat increased. yellowed paper box.

And the treasure that is in it's really nothing much to see.

And the tiny feet that wore them in the journeys of the past

Are toddling now in memories that all her life will last.

throughout the mountains, especially the children of preachers and students of particular promise who may be picked out by the County students of particular promise who may be picked out by the County Superintendents; and finally, there will be an increase of the extension service to spread some of Berea's benefits among the people who can never come to school themselves.

The members of the Executive Committee recently in session with the President were the Rev. William E. Barton, D. D., of Chicago, a graduate of the class of 1885. John R. Rogers of New York, a graduate of the class of 1874, the Rev. A. E. Thomson, D. D., of Lincoln Ridge, and Prof. E. A. Lyman of Ypsilanti,

#### I say. Not the sinner and saint, for 'tis FARM WORK INTERFERES WITH SCHOOLING IN KENTUCKY

#### Child Labor Investigators Report on Rural School Attendance

A detailed report of a study of farm work and school attendance in seven counties in Kentucky in 1916 has just been published by the National Child Labor Committee in the quarterly Child Labor Bulletin. Rural Child labor has never received much attention, according to this Wherever you go you will find the world's Committee, but recent studies in Colorado, Kentucky and other states show that there is a close connection between children's work on the ance and high percentage of illiteracy in rural districts.

> One reason for this state of affairs is said to be that "farm work is steady, whereas illness (as a cause of absence) is occasional; moreover, farm work occurs year after year, while illness may occur only once."

The work the children do on Kentucky farms is chiefly in the tobacco fields, the investigators found, although other forms of farm work also exist. Considerable space is given in the report to a discussion of the economic condition of the tenant farmer, because, "it may be that under the customary arrangements for sharing products with the landowners, for borrowing money and obtaining credit at stress, the tenant farmer is unable to keep his children in school throughout the term on account of the demands of his work and his inability to hire labor." A Kentucky school trustee is quoted as saying, "Give us a fair price for our tobacco and I will guarantee that the farmers will send their children to school and illiteracy will be wiped out."

## What He Missed.

There's no use talking about it, when you get the public to the point where it understands one kind of art you ought to lead it by easy stages to the next higher variety. Don't spring it all at once on them. A few days ago we said to a friend of ours:

"Saw you going over to the Art museum yesterday. How did you like it?" "Oh, the pictures were pretty good," he answered, "but there weren't any jokes under them."-Cleveland Plain

Mrs. Nuliwed (telephoning the coal man)—Send us a ton at once, please, and be sure, sir, that it is good and fresh.-Puck.

# SIX DOORS

# FOR ASPIRING YOUNG PEOPLE

1st Door-Berea's Vocational Schools

Training that adds to your money-earning power, combined with general education.

FOR YOUNG MEN-Agriculture, Carpentry, Bricklaying, Printing. Commerce and Telegraphy.

FOR YOUNG LADIES-Home Science, Dressmaking, Cooking, Nursing, Stenography and Typewriting.

# 2nd Door—Berea's Foundation School

General Education for those not far advanced, combined with some vocational training. No matter what your present advancement, we can put you with others like yourself and give chance for most rapid progress.

# 3rd Door—Berea's General Academy Course

For those who are not expecting to teach and who are not going thru College and desire more general education. It also gives the best general education for those who wish a good start in study and expect to carry it on by themselves

# 4th Door-Berea's Normal School

This gives the best training for those who expect to leach. Courses are so arranged that young people can teach through the summer and fall and attend school through the winter and spring, thus earning money to keep right on in their course of study.

Read Dinsmore's great book, "How to Teach a District School."

# 5th Door—Berea's Preparatory Academy Course

This is the straight road to College-best training in Mathematics. Science, Languages, History and all preparatory subjects. The Academy is now Berea's largest department.

## 6th Door—Berea College

This is the crown of the whole Institution, and provides standard courses in all advanced subjects.

PAYMENT MUST BE IN ADVANCE, incidental fee and room rent by the term, board by the half term. Installments are as follows:

#### SPRING TERM

VOCATIONAL AND	ACADEMY	
FOUNDATION SCHOOLS	AND NORMAL	COLLEGE
Incidental Fee \$ 5.00	\$ 6.00	\$ 7.00
Room 4.00	5.00	5.00
Board, 5 weeks 6.75	6.75	6.75
Amount due March 28 15.75	17.75	18.75

Bookkeeping (regular course)	7.00	6.00	5.00
Business course for students a other departments:			
Stenography Typewriting, with one hour's	10.50	9.00	7.50
use of instrument	7.00	6.00	5.00
Com. Law., Com. Geog., Com.			
Arith., or Penmanship, each	2.10	1.80	1.50

In no case will special Business Fees exceed \$15.00 per term.

other counties and states.

Any able-bodied young man or young woman can get an education

Berea if there is the will to do so. It is a great advantage to continue during winter and spring and have a full year of continuous study. Many young people waste time in the public schools going over and over the same things when there might be improving much faster by coming to Berea and starting in on new studies with some of the best young men and women from

Applicants must bring or send a testimonial showing that they are above 15 years old, in good health and of good character. This may be signed by some former Berea student or some reliable teacher or neighbor. The use of tobacco is strictly forbidden.

Spring Term opens March 28th. Rooms nearly all taken. Don't come unless room is engaged by a dollar sent to your friend, the Secretary,

MARSHALL E. VAUGHN, Berea, Ky.

# Fill In Picture Puzzle No. 11

IGHT, children, the last picture you drew was that of the American eagle. It has a bald head, hasn't it? And it is one of the most powerful and swiftest birds is it not? Now, here's a new one for you. Start with a soft pencil at No. 1 and see the result. You'll find that you'll have a useful do-mestic bird. It will remind you of a fable. The feathers are used in many things. The eggs of this bird make fine eating. Now start your pencil.
